

WasteTrade.com

The Global Waste Marketplace

A white semi-truck with the WasteTrade.com logo on its side is driving on a multi-lane highway. The truck is moving towards the right side of the frame. The background features a dense forest of evergreen trees under a dramatic sky with a setting or rising sun, creating a warm, golden glow. The sun is partially obscured by clouds, and its rays are visible. The overall scene is a high-quality, professional photograph used for a marketing or promotional purpose.

WasteTrade.com

**THE GLOBAL
MARKETPLACE**

Buyers

Source the materials you need at the most competitive prices from our network of thousands of verified users.

Sellers

Bring your materials to market and generate competitive demand from trusted buyers.

Wanted Listings

List your material requirements on the marketplace and receive tailored offers from our global supplier network.

Logistics

Simplify logistics with automated workflows and access to competitive haulage networks.

Compliance

We take the complexity out of compliance with automated processes and end-to-end documentation.

Due Diligence

Rigorous onboarding checks ensure all buyers and sellers are vetted, verified, compliant, and approved to trade.

 **WasteTrade**
The Global Waste Marketplace

The WasteTrade Marketplace

The WasteTrade Marketplace connects global supply and demand for recyclable materials inside one platform. It provides clear visibility of pricing, availability, and market activity, helping businesses understand where value sits.

By opening access to a wider network of active buyers and sellers, we enable materials to move more efficiently beyond local markets. The platform creates consistent liquidity by matching supply with real demand, while giving businesses the flexibility to manage how and who they trade with.

Data Security

Security is at the very core of the technology we build, in our encrypted systems, secure payment gateways, and robust infrastructures. The platform maintains user anonymity, protecting identities and sensitive commercial information.

Digital Product Passports

Digital Product Passports turn material data into a structured, traceable asset, capturing origin, composition, and lifecycle information in one place. This data travels with the material, giving full visibility at every stage of its journey.

By standardising and centralising information, it improves transparency, consistency, and decision-making across the supply chain. Within WasteTrade, this data can be reused seamlessly, unlocking more efficient trading and compliance.

DIWASS Compliance

DIWASS introduces a fully digital system for waste shipment reporting, requiring accurate, standardised data for every movement. WasteTrade is built to be DIWASS compliant, capturing and structuring this data as part of the trading process.

Using Digital Product Passports, the platform can automatically populate DIWASS submissions, removing manual input and saving time. The result is faster, more reliable compliance with less admin and reduced risk of error.

AI Material Recognition

Our developers are innovating cutting-edge AI-driven material recognition technology to improve the speed, accuracy, and consistency of material identification. By reducing reliance on manual processes, it helps minimise human error and lowers the risk of misidentified materials.

This supports more reliable trading outcomes and greater confidence in every transaction.

Global Reach, Local Impact

Offices worldwide delivering local solutions

Think Carbon

Think Carbon is an AI-powered carbon calculator designed to bring about a fundamental change in the way industries operate.

Businesses are finally able to understand, compare, and reduce the carbon impact of their decisions in real time, supporting more sustainable outcomes across the supply chain.

“Delivering Scalable Circularity”

About Us

WasteTrade is the global online marketplace for waste and recycled commodities. We seamlessly connect all parties involved, such as waste producers, logistics companies, recyclers, and manufacturers, for the most efficient, ethical, and profitable material trading experience.

The team behind WasteTrade has decades of experience in all aspects of the waste management industry; partnering this expertise with innovators in the tech space has created the most powerful digital tool in recycling.

Mission Statement

To lead the global shift to sustainable waste management by advancing technology, promoting ethical recycling, and balancing profitability with environmental responsibility in a circular economy.

Vision Statement

Creating a world where waste becomes a resource by connecting producers, recyclers, and manufacturers to foster a circular economy.
